We offer your business innovation without disruption.

Our integrated solutions ensure innovative results

Our unique approach ensures consistency across all on-premise, on-demand, and on-device applications, designing and orchestrating them to fit together as “networked solutions.”

Our product strategy leverages in-memory, cloud, and mobile technologies in a way that builds on our existing application platform, helping to minimize disruption for our customers.

How we deliver innovation

We build

Industry leader in R&D investment*

We integrate

Acquire companies that deliver innovation, not legacy technology

We partner

Co-innovating new solutions and technologies with customers and partners

Note *Three-year average of R&D as percent of revenue, as reported publicly

We deliver the “real” real-time enterprise through the most advanced in-memory technology.

SAP High Performance Analytic Appliance (SAP HANA)

SAP HANA is the engine of the real-time enterprise. It provides a foundation on which to build a new generation of applications, enabling customers to analyze large quantities of data from virtually any source, in real time. The example below showcases actual customer performance of a core reporting process.

Experience the real-time Enterprise in action

A live analysis by a consumer products company reveals how SAP HANA analyzes current point-of-sale data in real time—empowering this organization to review segmentation, merchandising, inventory management, and forecasting information at the speed of thought.
